

GERMAN QUALITY SINCE 1972

For more than 40 years **hopf** Elektronik GmbH has been developing, manufacturing and selling highly-precise clock systems and time synchronization solutions. Our innovative products have been used by well-known companies across the globe to implement highly precise signals for the synchronization and time stamping of industrial applications, computer networks, industrial networks or to successfully run complex industrial projects.

Our product range includes OEM-modules, DIN-rail modules for mounting into control cabinets as well as complex, modular systems for time synchronization and time distribution . both in the form of well-proven, continuously developed standard solutions as well as individually developed, customized solutions according to specific customer requirements.

hopf Elektronik GmbH maintains a complete process flow, starting from development further to product design up to direct selling of our high-quality-products.

**Development processes, manufacturing and
quality assurance for the whole product range
are established in Germany
in accordance with the relevant regulations and standards.**

We are proud to say:

**All our solutions meet the internationally accepted
quality mark ¡MADE IN GERMANY!**

**As we are committed to the quality of our products and solutions,
you will receive a three-year manufacturer's warranty on every newly purchased clock system!**

hopf Elektronik GmbH . your reliable partner in the heart of Europe.
