

FG6890G01 Firmware Update v02.03 Readme

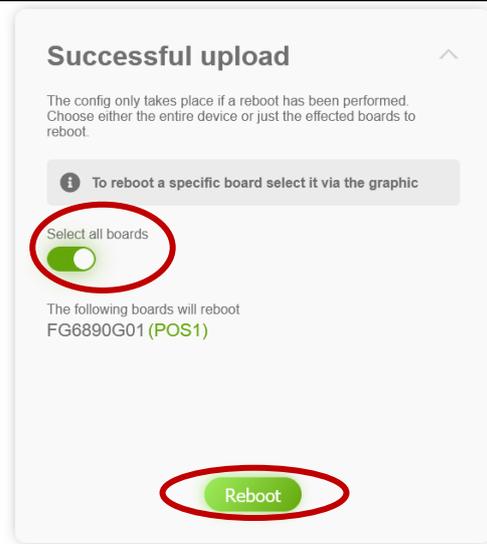

After the firmware update the FG6890G01 will detect a mismatch of the new firmware version and the firmware version stored in the configuration file of the FG6890G01. This mismatch results in a warning.

To resolve this warning a new configuration file must be generated and uploaded to the FG6890G01. The following steps must be performed to generate the new configuration:

<p>Open the configuration download page and press the Generate & apply button</p>													
<p>You will be forwarded to the configuration upload page. In the Status column POS1 and system have status Unchanged, cause only the version number will be updated.</p> <p>Press the Apply config button</p>	<table border="1" data-bbox="798 1675 1380 1780"> <thead> <tr> <th>Device</th> <th>Position</th> <th>Status</th> <th>Config</th> </tr> </thead> <tbody> <tr> <td>FG6890G01</td> <td>POS1</td> <td>Unchanged</td> <td></td> </tr> <tr> <td>FG6890G01</td> <td>system</td> <td>Unchanged</td> <td></td> </tr> </tbody> </table>	Device	Position	Status	Config	FG6890G01	POS1	Unchanged		FG6890G01	system	Unchanged	
Device	Position	Status	Config										
FG6890G01	POS1	Unchanged											
FG6890G01	system	Unchanged											

Activate the Select all boards check box and then press the Reboot button to perform the configuration upload

After the following reboot the warning is resolved
